## READ What Everyone is Saying

### Feld Entertainment

*A.L. - Public Relations Manager*

"We could not have been more pleased with your EZ Glide 350 product and your outstanding service in regards to our **"Live with Regis and Kelly"** taping..."

"What started out as an annual Disney On Ice production number on the EZ Glide surface, quickly transformed into taping the entire "Live With Regis and Kelly" show on ice! This was something we had never done before in our previous years of working with you, and you accepted this challenge with enthusiasm, confidence and tremendous flexibility.

The result: The "Regis and Kelly" producers were thrilled not only with our performance, but with how we helped them turn the entire studio into a Winter Wonderland! It was a beautiful sight and a spectacle their viewers had never seen before.

From setting up rehearsals for our skaters at your rink, to finding a perfect sleigh prop for Regis and Kelly to sit in during their host chat, your team did everything possible to make sure our segment and the entire show ran smoothly.

We relied heavily on your team's expertise to guide us through uncharted territory, and you were nothing but helpful and accommodating every step of the way.

Please accept our many thanks and appreciation to everyone involved in this project. You truly are a phenomenal company and a pleasure to work with every year. We look forward to many more years to come!"

"As a professional hockey player for the past 15 years, I've been training and skating my whole career. Two years ago I put EZ Glide 350 in my basement and **it drastically increased my quickness, stick handling and shot.** I also used it with my children; son, 7, with his skill development, and daughter, 5, learning to skate. It helped them both tremendously and created a lot of family fun!"

### NHL Hockey Player

*Scott - Raleigh, NC*

"What I appreciated most from the staff was **their encouragement** through the process."

"This last Christmas, my company asked me to come up with an activity that would bring the community together during the Christmas season and incorporate a fundraiser for one of the non-profit organizations in our community. I embarked on the mission and knew I had to create something with a Christmas feel, family oriented, fun and importantly—different enough to attract attention. Well, I was able to accomplish all that and exceed everyone's expectations by creating an ice rink down town in the City of Chattanooga.

We rented the ice rink equipment from Ice Rink Engineering. The whole process was very simple. They explained everything at the beginning. They recommended the EZ Glide 350 synthetic ice rink and sent videos on what it is and how it works and also explained how to set it up, what to expect from users, how to handle the traffic and shared ideas on how to coordinate the running of the rink.

What I appreciated most from the staff was their encouragement through the process. When doing something different or new, many barriers can come up; the staff were all patient and supportive with me through the entire process. In the end, the event was successful, we created positive media attention, families came out and people want us to do it again, they even want a bigger rink this year. Thank you everyone at Ice Rink Engineering, I look forward to working with you all again."

### Public Skating Event & Fundraiser

*M.M. - Dale L. Buchanan  
and Associates*

**"...we raised double the amount the foundation raised last year..."**

# From our Clients

See What They Think!

"I gained two extra feet on my axle breadth by training on EZ Glide 350 for only a few weeks!"

*C. Bynum - Professional Figure Skater / Instructor*

## Hockey Coach & Parent

*Peter - Lake Placid, NY*

"I have nothing but positive things to say about your product as well as your company. Kathy Houston was very knowledgeable and made ordering painless. The shipment was fast and the panels were down one hour after I received them. My family and I were thrilled with the performance of the panels. I have been playing hockey for 35 years and have 4 sons that play as well up through college level."

I have also coached mites through Prep. School aged athletes, and I can honestly say, that the performance of the EZ Glide surface is remarkable. Even though we live a few hundred yards from the Olympic Center in Lake Placid NY with three indoor ice sheets as well as the speed skating oval, many of my kid's friends would rather skate and play pick-up games in our basement due to the ease and ability to come and go whenever they want. I am looking forward to moving the rink to the outside this spring and purchasing more panels to expand the playing surface size. Thanks again for a great product and positive experience."

"...I can honestly say, that the **performance of the EZ Glide surface is remarkable.**"

"On behalf of the hundreds of children and adults who were able to take part in The Children's Museum of the Upstate's first annual Winter Wonderland, we would like to express our sincerest gratitude for your services. The skating rink that you provided created an amazing winter atmosphere that would not have been achievable without your product and the amazing support of your team."

From the time spent educating our staff, to your attention to detail in installing the rink, **the customer service provided was world class.** We thank you deeply for the time and care spent to make our event such a huge success. We look forward to a partnership between The Children's Museum and Ice Rink Engineering for years to come!"

## The Children's Museum

*Carol - President / CEO*

## Parent/Homeowner

*Phil - Milton, MA*

"We have had our synthetic ice for a couple of months now. **I have noticed improvement in all the boys wrist shots and some of the kids on the teams fathers have to.** The boys Cole, 12, Jack, 11, Finn, 9 and our daughter Shaye, 6, use the ice in the basement all the time. The synthetic ice is better than I could have ever expected. Your product is awesome—it's going to last a long, long time. The cleaning process is simple as well."

## Preschool PTO President

*Sloan - First Presbyterian Academy*

"On behalf of the PTO Committee of First Presbyterian Academy, I would like to greatly express our appreciation for the use of the amazing ice rink EZ Glide 350 provided for our Fall Festival! The children loved it and there was an overwhelming response not only from our parents and teachers, but also from people in our community. Your company addressed our need to provide for both preschool and elementary aged children. Having the sleigh to push the younger children who were unable to skate by themselves delighted so many little hearts. The fact that parents were able to participate and interact with their children on the rink helped contribute to the great success it was. Parents continue to rave about it even today!"

Being behind the scenes was interesting to see how professional your workers were and how quickly they assembled and removed the rink in order to meet the needs of the shared space we were working with. Thank you again for all that you have done. We hope the ice rink will become a tradition for our school. You really helped turn a rainy day Fall Festival into a spectacular event!"

"Having the sleigh to push the younger children who were unable to skate by themselves **delighted so many little hearts.**"

## A select list of clients and projects utilizing EZ Glide 350®

The EZ Glide 350 product is the skating surface of choice for the Regis & Kelly Christmas Spectacular. For the past eight years we have partnered with them in order to make their annual holiday production an outstanding success!
